BUSINESS REVIEW AND PROSPECTS

Businesses

The Group is principally engaged in the manufacturing and sales of adhesives, primers, hardeners, vulcanized shoes adhesive related products used by the footwear manufacturers and acting as the sales agent for adhesives used in the production of electronic products and other products. These products are key production materials used in different phases during the manufacturing process of footwear and electronic products. Primers are used in the pretreatment of footwear components, including outsoles, insoles, and uppers, prior to the application of adhesives. Hardeners, being a curing agent, are used by mixing with adhesives to control or speed up the curing action of adhesives. The electronic adhesive related products are key materials used in bonding components of electronic products.

1. *The PRC market*

During the Period, by region, the turnover in the PRC market increased by 10.59% over last year to approximately HK\$117,216,000 (2014: HK\$105,995,000), representing approximately 43.71% of the Group's total turnover.

The Directors expected that the relevant market would maintain a steady growth in the coming year.

Production Facilities

1. *The Zhuhai Plant:*

In light of the upward trend of the Group's sales and the changes in the PRC market, the management decided to execute the second phase expansion project in the existing Zhuhai Plant. The management considered that by executing the second phase expansion project, the Group will be well-prepared to meet the production capacity requirement for the development of its OEM business in the future. At present, the relevant construction of the Zhuhai Plant, including the addition of production equipment, warehousing facilities and extension of plants, has commenced as planned.

2. *The Zhongshan Plant:*

In order to alleviate the pressure on the production capacity of the Zhuhai Plant, the Group has installed additional production equipment in the Zhongshan Plant to enhance its production capacity.

3. *The Vietnam Plant:*

Given the orderly shift of the footwear manufacturing industry to the Southeast Asia as well as the necessity to satisfy the needs for market development in the future, the management decided to expand the existing scale of the Vietnam Plant in the future. In order to meet the current production capacity requirement, the Group rented additional warehouses in the industrial zone where its existing plant is located so as to make space for the installation of additional production equipment to enhance the production capacity of its existing plant. The new Vietnam plant is now entering into the preparation stage as planned, suitable industrial sites has been acquired and design for the plant and warehouses is underway.

4. *The Indonesia Plant:*

To ensure the provision of stable services for local customers, the Group's Indonesia Plant has been operating normally and the existing bonded warehouses have ceased operation.

Cost Control

The Group will continue to carefully review and extensively investigate into the current situation in relation to costs and resources deployment. The Group will also improve its internal management in a proactive manner for the purposes of effectively controlling and lowering the operating costs.

Research and Development

As always, the Group will continuously develop premium products on an environmental friendly basis to meet the market needs for quality products, and closely observe the development trend in the future to research and develop products pre-emptively in order to meet the future development needs in the industry. In addition to the technology cooperation between the Group and the No-Tape Japan as well as having its own research and development team, the Group also entered into technology cooperation agreements with several sophisticated technology experts in the industry (including those from countries and regions such as Japan, Taiwan and Hong Kong). Hopefully, such measures will enhance the research and development capability of the Group so as to maintain the leading position of its technologies in the industry.

Prospects

The Directors are relatively optimistic towards the growth of the Group's results for the coming year. In view of the current situations including continued growth in global demand for footwear, more stringent requirement from the manufacturers for the quality of adhesives, rapid increase in the demand for the use of environmental friendly water-based adhesive products by footwear brands and manufacturers, and ongoing diversion of the footwear manufacturing industry to countries or regions with lower costs, the effect of the previous regional deployments of the Group is becoming prominent under the swift changes in the market. The Directors believe that the abovementioned market changes will positively enhance the sales performance of the Group, and anticipate stable growth in the sales of traditional shoe-making adhesive products for the coming year, with significant growth in the new footwear manufacturing bases in Asia in particular. The Group will continue to devote more resources to expedite/enhance marketing in order to increase its market share.

Leveraging on the Group's solid experience accumulated over the years, premium products recognized by the market and its competence in research and development/improvement of products, the Group will commit itself to a continuous healthy business growth in the industry, and gear up for any opportunity arising from economic recovery. In the meantime, the Group will implement the business strategy of diversified development, including devoting more resources and accelerating the development of its agent business, including electronic adhesive related products. In addition, the Group will invest and develop its OEM business in a proactive manner. At present, it has entered into an OEM cooperation agreement with a world renowned enterprise for a term of 6 years. The Group will also explore and identify synergic investment opportunities in order to broaden its revenue sources, improve its competence in response to future changes and development in the market, and maximize the returns for its shareholders and employees.

In view of the positive progress of the Blue Sky Group during the period under review, the Group expects it can bring positive contribution in coming future.

In the case that the profit guarantee is not met, the Group will receive a compensation of maximum of HK\$21,000,000 which is equal to the consideration of the acquisition. As of 31 March 2015, the fair value of the profit guarantee was measured by an independent professional qualified valuer amounted to approximately HK\$10,363,000 and has been recognised as other financial assets.

In addition, the management may also invest in new business projects in situations they consider in favour to the future of the Group. Given the current uncertain market conditions, the management may fund new projects not mentioned in the Prospectus through fund raising or loans while reserve the internal resources for its core businesses.

INTRODUCTION

We have reviewed the interim financial information set out on pages 18 to 40, which comprises the condensed consolidated statement of financial position of Infinity Chemical Holdings Company Limited (the “Company”) and its subsidiaries (together, the “Group”) as of 31 March 2015 and the related condensed consolidated statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the six-month period then ended and certain explanatory notes. The Main Board Listing Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of a report on interim financial information to be in compliance with the relevant provisions thereof and Hong Kong Accounting Standard 34 “Interim Financial Reporting” (“HKAS 34”) issued by the Hong Kong Institute of Certified Public Accountants. The directors of the Company are responsible for the preparation and presentation of this interim financial information in accordance with HKAS 34. Our responsibility is to express a conclusion on this interim financial information based on our review, and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. SCOPE OF REVIEW

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 “Review of Interim Financial Information Performed by the Independent Auditor of the Entity” issued by the Hong Kong Institute of Certified Public Accountants. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the interim financial information is not prepared, in all material respects, in accordance with HKAS 34.
